

VITAL-ETHIO

The Bridge From Data To Discovery

Tagline:

Turn wellness data into real-world action.

1. Executive Summary

VITAL-ETHIO is an AI-powered wellness concierge that transforms health and lifestyle data into personalized wellness prescriptions, home recovery plans, and direct bookings with wellness providers.

Rather than simply tracking steps, sleep, or screen time like traditional health applications, VITAL-ETHIO analyzes user behavior and provides actionable recommendations that improve wellbeing.

The platform connects users with wellness experiences such as yoga sessions, spa treatments, nutrition programs, fitness activities, and mental wellness services while creating a sustainable marketplace for wellness providers.

2. Problem Statement

Today's wellness apps collect enormous amounts of data:

- Step counts
- Sleep patterns
- Screen time
- Activity levels
- Mood logs

However, users rarely know what action they should take next.

At the same time, wellness providers often have unused capacity and struggle to reach customers who actually need their services.

This creates two problems:

For Users

"I have the data, but I don't know what to do with it."

For Wellness Providers

"We have services available, but we don't know who needs them."

3. Solution

VITAL-ETHIO acts as an AI wellness concierge.

The system continuously analyzes:

- Activity data
- Sleep trends
- Screen time behavior
- Mood check-ins
- Women's wellness assessments
- Nutrition and fasting inputs

The AI then generates:

- Wellness prescriptions
 - Recovery plans
 - Personalized recommendations
 - Partner bookings
 - Wellness alerts
-

4. Key Features

A. Wellness Intelligence Engine

Collects data from:

- Android Health Connect

- Apple Health
- Screen Time APIs
- Daily Pulse Surveys
- Women's Wellness Assessments

Produces:

- Recovery Score
 - Wellness Insights
 - Personalized Recommendations
-

B. AI Wellness Prescription

Example:

Prescription

Recovery Required

Reason:

Your sleep quality decreased by 32% this week while screen time increased significantly.

Recommended Action:

60-Minute Restorative Yoga

Provider:

Tulsi Yoga

Alternative Home Protocol:

- 20-minute walk
 - Drink 2 liters of water
 - No screens after 10 PM
-

C. Women's Wellness Hub

Supports:

- Cycle tracking
- Hormonal wellness assessments
- PCOS risk indicators
- Personalized wellness suggestions

Important:

The platform never diagnoses conditions.

Instead:

"Your responses indicate patterns commonly associated with hormonal imbalance.
Consider consulting a healthcare professional."

D. Wellness Marketplace

Users can:

- Discover services
- Book appointments
- Access discounts
- Receive AI recommendations

Providers can:

- Fill empty time slots
 - Launch flash promotions
 - Reach relevant customers
-

5. Revenue Model

Commission Model

10% commission on bookings.

Example:

Spa Session = 1,000 ETB

User Pays = 1,000 ETB

VITAL-ETHIO Keeps = 100 ETB

Partner Receives = 900 ETB

Premium Subscription

Includes:

- Advanced AI insights
 - Women's wellness analytics
 - Family wellness tracking
 - Voice wellness analysis (future)
-
